CAPACITY:	230V/50Hz
POWER CONSUMPTION:	180 W
MAX. WHEEL WEIGHT:	65 kg
DIM DIAMETER:	10" - 24"
RIM WIDTH:	1,5" - 20"
SHAFT DIAMETER:	40 mm
ACCURACY:	1 g
BALANCING TIME:	8 s
NOISE LEVEL:	< 70 dB (A)
WORKING TEMPERATURE:	5-50 °C
WEIGHT:	60 kg

STANDARD EQUIPMENT

The balancing machine is designed for balancing passenger car and light trucks ♦ monitor LCD 20" ♦ point laser pointer weight positioning ♦ automatic measurement wheel distance from the balancer, rim diameter and width ♦ active protective hood ♦ automatically wheel braking ♦ footbrake ♦ static, dynamic and ALU program ♦ quick optimization function, split unbalance and hide weights behind the rim arms ♦ possibility unit changes: inch / millimeter and gram / oz, self-diagnosis and calibration program.
